

REBAR TABLE

Care Guide

HAY

REBAR TABLE

Sylvain Willenz's Rebar collection is a series of coffee-, side- and tray tables that explores the possibilities of recontextualising construction materials and processes. The design juxtaposes the reinforced steel bar frame with black marble tops and metal trays to create a balanced aesthetic.

The tables are available in different sizes in round and rectangular shapes, and are suitable for using in private, corporate or public spaces.

CAUTION

With a little care you can prolong the life of your furniture. Follow the instructions for the materials of your specific product to make sure that it stays in the best shape for as long as possible.*

- Always remove stains quickly before they can do any permanent damage to the furniture.
- When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings.
- Use coasters under damp, hot or coloured objects to avoid permanent stains.

*The information below is only intended as a general guideline. For more information on how to remove specific stains, please enquire where you bought the furniture.

- Be careful not to scratch or damage the surface with sharp objects.
- Check the status of the gliders frequently and if worn down, contact your local retailer to buy replacements. The durability of the gliders will depend on the surface the table is placed on.
- Avoid improper use such as putting your feet on the table or standing on it.

CARE GUIDE

Powder coated steel

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean, dry cloth. Avoid using scouring cream or scouring pads, as they may scratch the surface.

Marble

As Marble is a natural material, each stone has unique colours, patterns and textures. Therefore, the surface's colour and finish may vary slightly from product to product. Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent, soap flakes or stone soap. Remove soap residue immediately using a clean, dry cloth. Using excessive cleaning products can leave a film and cause streaks. Avoid using scouring cream or scouring pads, as they may scratch the surface. Never use vinegar, ammonia, acetic acid or citric acid or abrasive cleaners. To optimally maintain the naturally beautiful appearance of the marble, we

recommend you regularly treat the furniture's surface with stone soap or soap flakes. With regular treatment, the surface will gradually gain a higher resistance to stains and acquire a silkier, more matte look.
